

FBHA Series

Chip Ferrite Bead High Current Type Size 0402

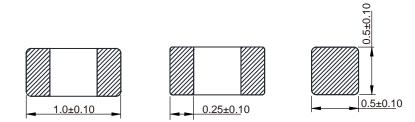

FEATURES

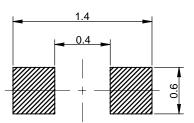

- Noise reduc on solu on for power line.
- Compared to the FBA series, has low direct current resistance for compa bility with lage currents op mal for low power consump on. Various frequency characteris cs with 2 materials of di erent features for countermeasures against everything from general signals to high-speed signals.
- Performs well even in signal lines where low direct current resistance is required.
- AEC-Q200 qualified
- Opera ng temperature: -55 to qu Q est finng frrifi o pera
 - 3 1
- a a ca minginin o pe

APPLICATION

Dimensions: [mm]

Land Pattern: [mm]

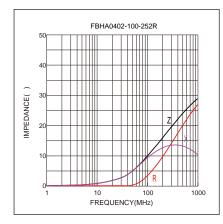

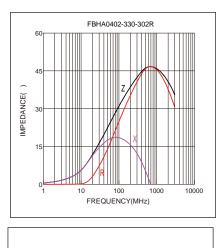

Electrical Properties:

Part No	Z@100Mz (Ω)	Tolerance	R (Ω)	l _R (mA)

		%		
		%		
		0⁄0		

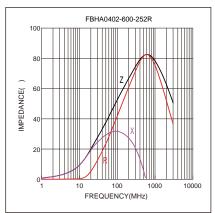

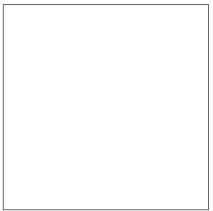

Typical Electrical Characteristics:

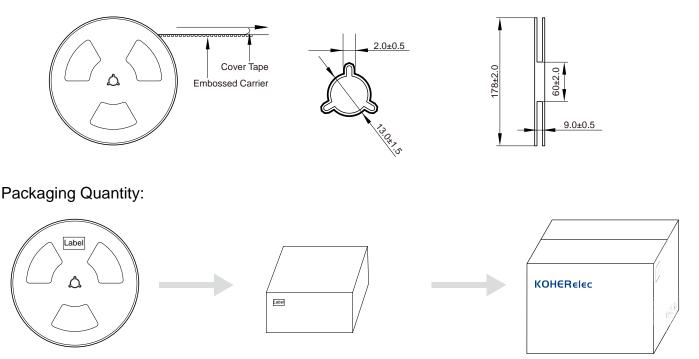

FR

Reel Dimension: [mm]

10000 Pcs/Reel

5 Reel /Inner box(50K Pcs)

8 Inner box/Carton box(400K Pcs)

Cautions and Warnings:

Storage Conditions:

- The storage period is within 12 months after the completion of production. Be sure to follow the storage conditions (temperature: -5 to 35°C, humidity: 75% RH Max). If the storage period elapses, the soldering of the terminal electrodes may deteriorate. The warranty period is one year.
- Product should not be exposed to environment with high temperature, high humidity, dust, corrosive gas and etc.
- Products should be handled with care to avoid damage or contamination from perspiration and skin oils.
- Please always handle products carefully to prevent any damage caused by dropping down or inappropriate removing.

Operation Instructions:

- Self heating (temperature increase) occurs when the power is turned ON, so the tolerance should be sufficient for the set thermal design.
- Before soldering, be sure to preheat components. The preheating temperature should be set so that the temperature difference between the solder temperature and chip temperature does not exceed 150°C.
- Soldering corrections after mounting should be within the range of the conditions determined in the specifications. If overheated, a short circuit, performance deterioration, or lifespan shortening may occur.
- Generally, Koher might not be familiar with either customer's specific application or actual requests as customer does. As a result customer shall be responsible for checking and confirming whether Koher product with the performance described in the product specification is suitable for using in customer's particular application or not.
